Operator

SL1 Operator Learning Path with Certification

Learn the basics of monitoring using the SL1 platform while earning your SL1 Certified Operator certificate.

- **WHO ARE YOU?**
  A Network Operations Center operator who uses the SL1 platform for day-to-day monitoring.

- **WHAT YOU WILL LEARN:**
  How to quickly and efficiently see, contextualize, and act upon events and event-driven data that correlate with infrastructure downtime.

- **NOTE:**
  This learning path is intended for SL1 NOC Operators using SL1 as Software-as-a-Service (SaaS), on-premise installations, hybrid environments and SL1 Cloud platforms.

Learn Monitoring Basics in the ScienceLogic SL1 User Interface

Topics Include:

DISCOVER
Learn how to discover, organize, and manage devices, device components, networks and applications.

VISUALIZE
Learn how to use the SL1 event page to gain visibility into events, troubleshoot conditions, and tune event policies.

MONITOR
Learn how to create automation responses, address event conditions, improve event definitions, and auto-clear events without human intervention.
