ScienceLogic

True AIOps For IT Operations

Top AIOps Differentiators for ScienceLogic SL1

IT-Forged AIOps

Designed by IT veterans to support real-world IT operations requirements, SL1 provides insights covering apps to networks to cloud to servers to storage, and everything in between.

A More Complete Platform

Monitor, analyze, and automate from a single interface. **SL1 reduces TCO for AIOps** with a complete platform that provides AI/ML driven insights and automates a broad range of break/fix, ITSM, DevOps, and security actions, all from a single platform.

Autonomic IT Operations

Take control of how you use AI and automation. SL1 gives you the power to **decide what operations are human-assisted or fully autonomous depending on comfort level.** When fully automated, SL1 can **free staff from > 50% of common IT Tasks.**

Superior Root Cause Accuracy

ML-driven root cause analysis automatically correlates event data, creates fingerprints, and compares it with learned patterns to extract root cause **with >95% accuracy and up to 60% faster repair times.**

Self-Tuned to Your IT Estate

SL1 unsupervised ML continually adapts and improves analysis of issues by learning from data gathered across your IT estate. As more patterns are learned, scored, and approved, **root cause accuracy is tuned to your unique IT stack, not someone else's.**

Unknown Issue Detection & Analysis

In addition to analyzing issues from IT services, SL1 ML monitors and scores the significance of anomalous behavior, to **address probable issues before they become outages.**

Empower and Accelerate Staff

SL1 leverages Generative-AI to convert complicated log details into easy-to-understand, actionable insight **empowering more staff to act quickly.** Double-click detail **helps staff learn and understand the interconnected IT estate in less time.**

Superior Visibility for Accuracy

Increase AIOps effectiveness by capturing data from more of your IT estate. With **support for 100s of IT devices, apps, and services out of the box plus advanced discovery and low code custom resource monitoring, SL1 AI detects a broader range of issues with higher accuracy.**
